

Please take note before you measure;

Screens are manufactured to **SCREEN SIZE** (edge of frame to edge of frame excluding fittings). FLYDOR do not make any adjustments or allowances. All Measurements are in mm. Sizes to be supplied as Width x Height.

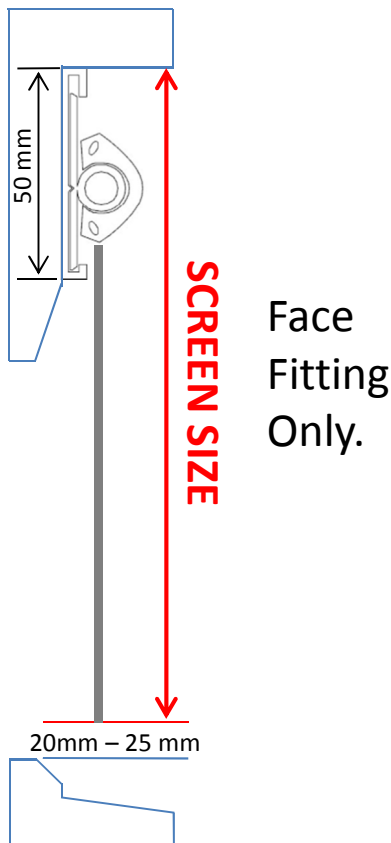

WIDTH

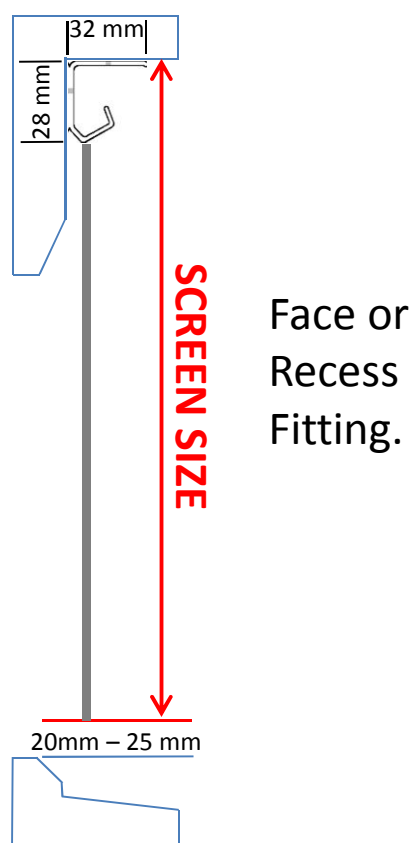

***Important information for Mesh and PVC strip curtains with Stainless steel hooked suspension rails.**

To ensure correct fitting of the strips, the rail is cut between the "hooks". Each cutting point is 41mm apart, therefore the overall width must be a multiple of 41mm. Exact widths may not be available, please call our sales team for advice.

HEIGHT PVC Headrail

HEIGHT Steel Suspension Headrail

Height Measurement (All types)

The height is from the top edge of the headrail to the bottom edge of the Mesh or PVC. Always allow 20-25mm above any threshold or floor surface for the strips to swing freely.
